**DELTATEC** is looking for a:

### Experienced FPGA Design Engineer (m/f)

**Mission**

- Take part, as team member, in the architecture, design and implementation of electronic hardware projects in various domains (camera design, space electronics, embedded systems, professional video, ...)
- Specify, develop and test FPGA design and test setup
- Deployment of the product in collaboration with customers
- Explore and implement new technologies in R&D and research projects

**Profile**

- Master Degree in Electronic/Electrical Engineer
- Good knowledge of VHDL language and design/simulation/debug environments
- Familiar with C language and experience in microcontroller design
- Board design experience (schematics, PCB) is an asset
- Good knowledge of French and English
- Passion for technology

**Offer**

- Challenging work and career evolution opportunities in a fast growing SME with international reputation.
- Join a team of talented and brotherly engineers.
- Competitive salary and conditions
