DELTACAST provides advanced sports & TV show solutions. More on **www.deltacast.com**

DELTATEC is looking for a:

Senior Embedded Software Engineer (m/f)

Mission

- Take part, as a system architect to mixed hardware and software design
- Ensure that all aspects of the discipline (codes, practices and tools) are controlled and stable all along lifecycle phases of projects
- Ensure the capitalization and sharing of knowledge (building blocks, best practices,…)
- Ensure implantation of multi-project synergies in order to optimize cost of technical solutions
- Ensure efficiency of the development team
- Take part and support specifications writing, driven by requirements management
- Take responsibility, from a technical point of view, of a project by reporting to the project manager
- Support and review the software developers' (code and specifications)
- Take part to the early brainstorm of projects that involve hardware and software co-design
- Lead R&D mission to explore new technologies and research project.

Profile

- Master Degree in Electronic,/Electrical Engineer or Computer Science
- More than 5 years of experience in embedded system design
- Proven experience with either hardware electronics or embedded software
- Good knowledge of French and English
- Strong communication and influencing skills
- Able to support and encourage innovative ideas, create and give space for curiosity
- Passion for technology

Assets

- Strong knowledge in software development (OOP, C and C++ languages)
- Experience in embedded system design that involve HW co-design (including the use of Soc, FPGA, …)
- Experience in an electronic laboratory environment
- Experience in communication systems (CAN,UART, SPI, I2C, Ethernet, …)
- Knowledge in other language like C# is a precious asset
- Knowledge in kernel programming (Windows and Linux OSx is an asset)
- Knowledge in the process of building custom Linux image (Yocto and/or buildroot)

Offer

- Challenging work and career evolution opportunities in a fast growing SME with international reputation.
- Join a team of talented and brotherly engineers.
- Competitive salary and conditions
